Hello
Are you listening?
Your miles away from here and now and still
you think that you're standing right on top
Promises, were wishful thinking
Oh valentine, I fear we're near the end
the knowledge of someday's what I've got

You said don't leave me now
I said I tried
You said try harder
and I said let go

Thrown
out of frustration
Are wasted stones, they're better used to build
your anger will leave you unfulfilled
And what I'll miss is air to breathe
and validation
you'll miss the blank stare
of my bloodshot eyes
circumstance and compromise

You said don't leave me now
I said I tried
You said try harder
and I said let go

You said don't leave me now
I said don't cry
You just cried harder
and I just let go

Don't sink into this valuable lesson with me
save yourself
