Now lets take a trip down memory lane  
Back to junior high school where it all began  
Three bad little kids raisin hell at school  
We were just thirteen straight actin a fool  
Everyday after class kiv's house was the spot  
Makin crazy prank calls hopin not to get caught

Best friends, blood brothers, yo we one and the same  
Till one faithful afternoon when everything changed  
One day playin punch out up in kiv's room  
The house started shaking then we heard a kaboom  
Looked out the back window saw a pillar of smoke  
Yo, your backyard is smashed, man this isnt a joke  
Yo, lets check this out man, oh i bet, lets go

All the smoke and dupri led us straight to the basement  
Yo, what the hell is that? man it looks like a spaceship  
We all ran for cover, as the hatch opened wide  
And a little green dude stepped out from inside

He said, im from mars and i come in peace  
I have something to ask and its not discrete  
Theres a mutated strain in our DNA helix  
And you three kids are the ones who can heal it

But we're just thirteen man, what can we do?  
How do i put this? i think we should screw (what?)  
On my home planet, we can no longer breed  
I've been sent to self-percept so we can store your  
seed  
Storin our seed? yo i think he means sex  
Man, i'm a virgin, we all our bet

I'm just gonna lie here and close my eyes  
Ah, what should we do? now its spreading its thighs  
You'll be heros on my planet, but why us three?  
Your the chosen ones, you'll just have to trust me

Yo, should we do it? man i dont know  
Yo I say we put it to a vote, all in favor say I,I  
Okay we're in, cool, who should go first?

I have three depositories to capture your burst  
Wait, so at the same time? yeah thats what i was  
thinking  
Here's some wine coolers, lets get you boys drinking

We pouted the drink and started getting tipsy  
Then took our positions and started getting frisky  
One in the front and two in the back  
Had him locked up like a chinese finger trap

Keep humping away, my wife and family thank you  
I'm about to explode, yo son me too  
Three way climax, best friends forever  
What a blessing to have lost our virginities together  
(yeah)

Andy, Jorm, and Kiv you saved my race  
Your reward is one wish, then i'll go back to space  
We looked at eachother, didnt have to talk  
We knew what we wanted before he took off

Mr. Alien sir, for what it's worth  
We wanna be the greatest fake MC's on earth  
Your wish is granted and thanks again  
I may have saved my planet but i'm loosing three  
friends  
What happened today was both incredible and bad  
Therefor your name is incredibad

Incredibad  
Suprise everyone!
