I have never, never walked alone  
Though you're far ahead you have never left me  
behind  
There are days I can't avoid the stones in the middle of  
the road  
But I have never, never walked alone

I will never be afraid for any time  
In so many ways you have anchored your arm to mine  
There are days when I lean heavily upon you to guide  
me home  
But I have never, no never walked alone

In my search for human kindness  
When it all gets out of pace  
Your love's the one thing that gets me by  
For I have never, no never walked alone

You have listened to a thousand calls in the dark  
before the dawn  
I have never, never walked alone  
We have worked it out together, so I can say somehow  
I've known  
That I have never, no never walked alone
