"Friends"

Visit "[Friends](#)" on MotoLyrics.com

Did you ever ride on a subway train
Beneath a great city could you feel the pain
Of people trapped in their separate ways
Too scared to even meet each others gaze
Or walk the streets in a giant crowd
And feel so alone you could cry out loud
For the friends youve left so far away
And the friends youre still going to meet
Someday
And I carry your faces everywhere I go
You talk to me when Im feeling low
I cant forget you though were far apart
Cause youre here in my memory and you live in my
heart
Some people say that friends arent real
But theyve never known the way I feel
When you learn to give and you live to share
Youll find youre never alone no matter where
Cause theres something deep inside of you
That I know real well its inside of me too
And I carry your faces
