you know religion its just not cool  
when you believe it you play the fool  
my friends all wonder how it could be  
the things that blind them they just cant see  
they think its harmless NO WAY MAN  
the process of power an ingredient of war  
they get em young when theyre easy prey  
they almost got me one day  
the devil was following close behind  
the universe in terror  
churches of fear  
you do what they want  
churches of ignorance  
protected by god  
churches of fear  
theyre leading you on  
(bass solo)(stupid fuckers)  
one sided mindless fairy tales  
sometimes i wonder where are all the adults  
heaven for you heaven for me  
itll be real groovy just wait to see  
get on your knees and beg  
beg to be saved  
you dont control your own life  
you are a slave  
burning books nazi crooks  
the fang draws the blood  
all the pain and suffering in the name of dog  
churches of fear
