I met her down in China Town
We started talking and walking around
She led me on in a New York minute
And now she's gone but I'm still in it

You, I can't get over you
I can't get over you
I can't get over you

This city's pretty when you love someone
All the lights are shining, yet it's so much fun
A million different women are just walking around
But I'm still stuck on the one that I've found

Oh, don't you want me, or even miss me
Oh, don't you want me too, ooo hooo
Don't you want me, come and kiss me
Why don't you want me, too

I need to Move On, cuz there's nothin left to say
To the one that got away, hey
Move On, cuz there's nothin left to say
To the one that got away, hey
The one that got away, the one that got away baby
The one that got away

I can't get over you (3 more times)

Oh, don't you want me, or even miss me
Why, don't you want me too, ooo hooo
Don't you want me, come and kiss me
Why don't you want me, too

I need to Move On, cuz there's nothin left to say
To the one that got away, hey
Move On, cuz there's nothin left to say
To the one that got away, hey (2 more times)

I can't get over you (2 more times)
