So future boy where are you from
My time machine crashed over yonder
Syphilis is a bitch
But contracting HIV is much worse

Why are you pushing info into me
I have no need for it, I'm from the stars
I thought you'd like to know your scoop
I'm taking babies back with me, yeah

I'm taking them back home
So they can see there's a much better place
I've got a sister with an open mind
And my friends are all junkies but they're still my
friends

As long as they don't use monkeys
We enjoy the heat of stolen days in the summer of 93
Well the future boy said I've got friends but you know
sometimes
It all depends on how tall they are against yourself

Well I am the future boy, I am the future boy
I am the future boy, I am the future boy
Well I am the future boy, I am the future boy
I am the future boy, I am the future boy

Now my friends have all gone and left me
So I decided to come here and see myself as a baby
But it looks like I'm stuck here this time
Oh shit, I'm gonna miss my friends

And no you're still the future boy, yes I'm still the future
boy
We'll build you a time machine to get back home
Still the future boy, still the future boy
Still the future boy, oh I'm still the future boy

Still the future boy, still the future boy
Still the future boy, well I'm still the future boy
