Well, if this gets ugly, I'd swear  
This ain't our last chance  
The vultures that circle my head  
Are flying alongside

The world's turning

I let somebody get under my skin  
Long distance losin' is all that I've seen  
Now there's a river, now there's a river

Nothing can save me, my reserve betrayed me  
It calmed the hurricanes  
I'm burning to get there, the middle of nowhere  
Storm warnings flicker while

The world's turning

I let somebody get under my skin  
Long distance losin' is all that I've seen  
Now there's a river, now there's a river

I let somebody get under my skin  
Long distance losing is all that I've seen  
Now there's a river, now there's a river
