We were talking to each other 'til dawn

You put your arms around me and you asked me what is wrong

I tried to be so serious, you smiled and played along

You were leaving town tomorrow, yeah tomorrow you'll be gone

We must have had the stars above and heaven on our side

'Cause we fell in love before we even made it through the night

But you were leaving town, to start another kind of life

You walked me to the door and we tried to say goodbye

But maybe I've never found the right way

I kept my love hidden underground

Baby I wish that there was some way

That I could turn the clock around

I couldn't sleep, I called up everybody that I knew

All my friends said I'd be crazy if I waited 'round for you

And I wanted to believe then so I called to say we're through

But when I heard your voice, it nearly broke my heart in two

Maybe I've never found the right way

Kept my love hidden underground  
Baby I wish that there was some way  
That I could turn the clock around  
Some say... You're lost and I found you  
Someday...  
Well I jumped into the car  
But as I headed down the road  
I knew that when I got there, there might be nobody  
home  
You had gone away forever, and you left me all alone  
Now I was on my own  
Maybe I've never found the right way  
Kept my love hidden underground  
Baby I wish that there was some way  
That I could turn the clock around  
(That I could turn the clock around)  
(That I could turn the clock around)
