You came and like you came to get  
I don't quite know what to expect  
A first and careless rapture  
You'll be sorry ever after

Finish your beer and leave the room  
It was the sad of life's improved  
Don't ask me my past  
Cos you don't wanna know

—  
(CHORUS:)

Tell me where you wanna go  
and we'll go  
You know I wanna go faster  
Leave the story behind, ever after  
Ever after  
Cos noone's gona know

—  
So tell me where you wanna go

Driving through an endless night  
Talking easy watching light  
Don't tell me how you feel  
You'll be fine behind the wheel  
I take a left and drove straight on  
I can feel the city's gone  
We might never get there  
We might not get back home

CHORUS x4

Now tell me where you wanna go  
Now tell me where you wanna go  
Now tell me where you wanna go  
Now tell me where you wanna go
