Thought I ran into you whilst on the beat.
Then it turned out to be a burglary.
There is a record with all of the photographs.
I took her fingerprints and analysed hair strands.
I remember the crime, but I can't recall the name.
Now I wonder how whatsername has been.

Seems she evaded us without a trace
Did she leave the country with whatshisface?
There is a record with all of the photographs.
I took her fingerprints and analysed hair strands.
I remember the crime, but I can't recall the name.
Now I wonder how whatsername has been.
