

Twelve Gauge Valentine "Danger Lurking"

Visit "[Danger Lurking](#)" on MotoLyrics.com

One more chance and I swear I'll get it
call out your vultures..
Sharpening knives in the deepest shadows
run it by the council

we're stopping by to drop you in
and if you can't hold on
get it get it... get it...

we took the stage and we stole your show
and if it's all you've got I'll
get it get it... get it...

come out the shadows.. let's bring this to the light
I'm almost certain.. that this is gonna end tonight

I'll find a way out.. find a way out of here

One more chance and I swear I'll get it
call out your vultures..
Sharpening knives in the deepest shadows
run it by the council
we dropped a bomb on this town
and they still can't get it right
for the moment it seems.. to be a disaster

we dropped a bomb on this ghost town
follow me and you'll see. a catastrophe

we dropped a bomb on this town
and they still can't get it right
for the moment it seems.. to be a disaster

let's set things right
I wasn't around when this town came crashing down
it's about to explode...

take cover!! we don't need a massacre!!
