"Suicide"

Visit "[Suicide](#)" on MotoLyrics.com

Are you coming to the nightmare tonight
The world is out that you're ready to try
Don't bring a partner... you just come alone
Tell your folks you're not coming home...
Who's gonna notice as you walk on by
Who really cares if you live or die
and who's gonna miss you as you walk on by
..Have you ever tried suicide...
Goodbye is all you need say
You don't want to see another light of day
Your feeling dirty... cus you've been used
Nobody ever really loved you...
Who's gonna notice as you walk on by
Who really cares if you live or die
and who's gonna miss you as you walk on by
..Have you ever tried suicide...
Write your letter... but write it in blood
Your all alone... there is no god
Your feeling scared, stop running away
Nobody wanted you anyway...
Who's gonna notice as you walk on by
Who really cares if you live or die
and who's gonna miss you as you walk on by
..Have you ever tried suicide...
Come take my hand... come dance with me
Take just one step and you'll be free
You'll see no lies in these blood red eyes
You don't need to dream when you dancing in fire
..Have you ever tried suicide...
