You're like a strobe light
You leave and then you're back again
You leave without a sight
You're flashing on and off again
And when the time comes
To turn on the house lights
Let me grab a pen

You're like a strobe light
I think I'll pull the plug and then
You have a bad night
And never speak to me again
And when the time comes
To turn on the house lights
Can we still be friends?

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on
You think you're so tight
But you're oh so wrong
And when the time comes
To turn on the house lights
Well, then I'll be gone

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on

If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"
And when the time comes
To turn on the house lights
Well, then I'll be gone

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"

You're like a strobe light
But more off than on
If you'll just dance for one more song
Let me hear you say "Hey!"
