Whatchya gunna do  
Decisions plaguing you  
It fakes you out everytime  
Only so to climb

I know you're your wrong cuz you see i know everything

And you did it so well  
Said you tasted the sin  
All the times that we tried  
All the things to make it go away  
And you did it so well

I know you're wrong cuz you think you know everything

And you did it so well  
Said you tasted the sin  
All the times that we tried  
All the things to make it go away  
And you did it so well

I know it's not fair what I've gotta do here  
But I can see you the way I wanted to  
So I can be you

And you did it so well  
Said you tasted the sin  
If i walked a mile in your shoes  
I'd havea gun in my hands

I stand wiht the gun in my hand
