Ringin' your bell out by the pool  
Two olives go drop in my gin & vermouth  
Feelin' a little fanciful  
Will you wiggle your cherry and wash your stone

Do what you do  
I won't complain  
No one is coming to take you away  
It's just what you want  
And just like you said  
I'll never say no if you always say yes

Where you go is....  
Home is where you are, it's where you'll stay  
Where you go is....  
Home is where you are, it's where you'll stay  
Where you go is....

Moments go by, each in its place  
You're always in white in my memory  
Don't turn your head, don't hide your face  
I like you like this  
I like you this way

Can't get too close, won't go too far  
I'm right on your heels wherever you are  
What's there to take, and what's there to keep?  
We have what we have  
And that's all we need

On this little bed  
Don't rush me  
"Don't rush me," she says  
I might never change  
Don't hate me  
"Don't hate me," she says

A beautiful day, let's exercise  
Let's put the squeeze between your thighs  
Turn on the TV and fall asleep  
Early to bed for an afternoon dream

Isn't it pretty up here in the stars?  
A fortunate person are you, you are  
So worry no more, there's no more in need  
It's ours to spend and to use as we please

Where you go is....  
Home is where you are, it's where you'll stay  
Where you go is....  
Home is where you are, it's where you'll stay  
Where you go is....

Moments go by, each in its place  
You're always in white in my memory  
Don't turn your head, don't hide your face  
I like you like this  
I like you this way

Can't get too close, won't go too far  
I'm right on your heels wherever you are  
What's there to take, and what's there to keep?  
We have what we have  
And that's all we need

On this little bed  
Don't rush me  
"Don't rush me," she says  
I might never change  
Don't hate me  
"Don't hate me," she says
