

Low Life, The "You Are Everything"

Visit "[You Are Everything](#)" on MotoLyrics.com

Love her, leave her
Try to get the nerve to deceive her
I just dug myself deeper
Driving, sideways
I want to leave her stranded on the highway
Wish she would cheat so I could leave her
Love sick, lost it
Used to love your smell but now you're toxic
Faking smiles makes me nauseous
No lies, goodbye
I think Im gonna leave you on standby
Now Im heading for clear skies

Its my life, its my time
For cold drinks and sunshine
I'd be sitting pretty if it wasn't for the shitty grin on your
face
Night drive with Saint Ides
The wrong side, no headlights
Almost reached the interstate
The cops ran up my plates

You are everything that goes wrong
Youre my CD skipping on my favorite song
You are everything that goes wrong
You are all the rubbers busting in Saigon

Temper rising
I want to grip your neck and tighten
I'd take a chair to stop your whining
Rain cloud, black sky
Pouring on my head, I thirst for sunshine
If I cant leave you then you're dying
Cleave her, heave her
Drop her off the boat into the river
I wish she'd sink a bit deeper
Stop sign, state line
Feeling kind of bad cause its my first crime
Gotta make the border in record time

It's my life, it's my time

For cold drinks and sunshine
I'd be sittin pretty if it wasn't for the shitty grin on your
face
Night drive with Saint Ides
The wrong side, no headlights
Almost reached the interstate
The cops ran up my plates

You are everything that goes wrong
You're the resin clogging up my bong
You are everything that goes wrong
Getting crane kicked by Daniel San

And if I told you that I loved you, would you go away?
The less I seem to like you the longer you seem to stay,
yeah
I won't listen for one minute, cause you take all day
And there's nothing else left to say

You are everything that goes wrong
Como ser botado por la inmigracion

You are everything that goes wrong
You go Yoko, I'm not your John

You are everything that goes wrong
You're the girl we bitch about in every song

You are everything
