"Breathe Into"

Visit "[Breathe Into](#)" on MotoLyrics.com

And i walk
There's many i find
Believing in honesty, favours, all hopeful
And i've learned
Like many alive
Of miracles, parables, healings of faithful

Bedtime it's stories with family
Later learned and believed in

Live what you learn
And all that your mind needs
You'll find it well

And i grow
The aim of my life
That my words are building, consoling with wisdom
And i speak
All matter of times
Not preaching, but speaking from readings and
believing
