

Antique "Media"

Visit "[Media](#)" on MotoLyrics.com

I don't watch the news, I don't read the papers. It's all
the same. It's not the truth.
Shit on every station.
Freedom of the press means freedom to deceive
With all their twisted information used to control and
manipulate the population
They tell us communism is running rampant and
threatening our society
They install that fear to support their increasing military
Because they're in competition for control of the third
world so they
Can exploit it's people for lots of money
Open your eyes: Look and see
And when your television is your only form of
information
And when you believe all it's a saying about the actions
of this nation
You'll find no truth, just empty words
Nothing at all is what you've learned
And while your being misinformed
The actions of your government ar ignored.
