Alone tonight  
I'd rather be by your side  
As I drift out to sea  
I think I should be in another place  
Closer to the lips on your face

But now I'm even further away  
Now I'm even further away  
Now I'm even further away  
Now I'm even further away

I started a fire and burned it down  
My one desire is that beautiful sound  
The sound of your voice  
Tickling inside my mind now

But now I'm even further away  
Now I'm even further away  
Now I'm even further away  
Now I'm even further away  
From your secret sky  
Ringlets of your hair in your eyes
