Sharing with us what he knows
his shining eyes are big and blue
and all around him water flows
this world to him is new
this world to him is new
he's born to shimmer
he's born to shine
he's born to radiate
he's born to live
he's born to love
but we will teach him how to be
and this thing they call our time
i heard a brilliant woman say
she said "you know its crazy how i want to try and
capture mine"
i think i love this woman's way
i think i love this woman's...
the way she shimmers
the way she shines
the way she radiates
the way she lives
the way she loves
the way she never hates
sometimes i think of all this
that surrounds me
and i know it all is B in mind
but she kissed me and
she wraps herself around me
she gives me love
she gives me time
i feel fine...
i feel fine...
but time i cannot change
so here's to looking back
you know i dranked a whole bottle of my pride
and i toasted change
to keep this demons off my back...
just keep this demons off my back...
cuz i
want to shimmer
i want to shine

i want to radiate
i want to live
i want to love
i want to try and learn how not to hate
try not to hate
weâre born to shimmer
weâre born to shine
weâre born to radiate
weâre born to live
weâre born to love
weâre born to never hate
heâs born to shimmer
heâs born to shine
heâs born to radiate
heâs born to love
heâs born to love
but we will
teach him how... (fade out)
