(Danny Orton/Steve Dean)

I'd walk through fire
Take on the shadows
I do anything
For you, my love

I'd risk it all without thinking
All I can think about is holdin on

When my world feels like it's flyin up above the rain
Caught up in emotions that I can't explain
It's a never ending feeling I can't get enough of
I can't live without you baby, that's what I call love

Money talks, people listen
Some, they don't understand what it's all about
Cause it can't be bought, it's only given
Now that it's come along, there ain't no doubt

When my world feels like it's flyin up above the rain
Caught up in emotions that I can't explain
It's a never ending feeling I can't get enough of
I can't live without you baby, that's what I call love

Well I thought I'd looked in every corner
And I swore I'd opened every door
Just when I was giving up
I finally found the one that I'd been searching for

When my world feels like it's flyin up above the rain
Caught up in emotions that I can't explain
It's a never ending feeling I can't get enough of
I can't live without you baby, that's what I call love

I can't live without you baby, that's what I call love
