I can't believe it's cold enough
To wear this coat I just put up
With every step on crowded streets
I hold my breath to watch it leave
It never sounded quite as nice
You said my name and closed your eyes

Chorus:

One more shot to get me through the morning
One more night to get me through today
If all I had was one more word
Then all that I could say
I would say good bye to the girl who got away

Morning starts with coffee on
And a wasted thought to where you've gone
The leaves are changing every day
How they look so orange against the grey
I see your face but you're never there
I hear your name it's everywhere

Chorus

We talked about a film you'd seen
That reminded you of you and me
From the glass of wine for which I paid
'Til I caught the cab you took away

Chorus
