Oh, I know a thing or two about love  
And I know you've been sent from above  
You're my angel that fell from above

Sometimes I have a dream about you  
And wonder if sometimes you do  
Have dreams about us too

Chorus: I want you, need to hold you again  
This feeling breaks me, dont know that I can  
Try to stop this, End up loving you in the end

With someone else, you're standing there  
I act like I dont even care  
But I need you to know that I care

If I had three wishes here today  
I'd be giving two back and I'd say  
All I want is you every day

Chorus x 2

In the end  
In the end  
In the end  
In the end  
In the end
