Out on a limb
Just like a blindfolded tight rope walker
I tried to pull you in
Alarms went off like a house on fire

Where did you go?
I always thought you were the girl most likely to
Oh I didnt know that your quiet smile
Was a stone cold cry for help
All you ever wanted
Was someone to meet you in the middle

Pearls in the dust
Broken glass from your perfume bottle
Pieces of you like a faded picture inside a locket

Where did you go?
Where did those reckless angels take you to?
I'll never know how I missed the train back home
Back home to you

All you ever wanted
Was someone to meet you in the middle
Someone to love you just a little

Rain on the glass
Even the clouds are crying for you
November Blue
The lonely trees are dying for you

Where did you go?
If I'm forgiving what you said
Well I'll never know how I could stand so close
And be so blind

All you ever wanted
Was someone to meet you in the middle
Someone to love you just a little
We'll meet you in the middle
