[*Chorus*]

I love you
Do you know I mean
I need you
Can you just hear me scream
I want you
Can you bear with me now
Cause hear me out baby... I love you

[*Verse*]

And I know that its true
Cause when I'm around you
I hear my heart beat louder and louder
Cause baby I know...

[*Chorus*]

I love you
Do you get what I mean
I need you
Can you just hear me scream
I want you
Can you bear with me now
Cause hear me out baby... I love you

[*Verse*]

But do you love me to
I asked you
But you looked me down
I didn't know a thing but now I know...

[*Bridge*]

That we were not meant to last
That you and me are over now
You blinded me with your charms
But but baby now I have to admit I do...

[*Chorus*]

I still love you
But I know you don't care
I don't need you
But I think I still do

I still want you
But I know theres no point
Cause baby
You crossed the line
Baby
I shouldn't have opened my mind

[*Outro*]
But I still love you (yeah)
But I don't need you (no way)
But I still want you
And I know its not gonna happen
So baby... Please let me move out...
Please baby... Let me move out...
