"Work It Out"

Visit "[Work It Out](#)" on MotoLyrics.com

Yea I kno we've had our hard times
Yea I kno sometimes it seems like
Like we both are just sick and tired
Of fighting about who is right

How many times we said it's over
How many times we said there's no more us
boy I kno by now, wat no more means
It's temporary til we get over things

Now you say that this is our last time
Now you say this is our last goodbye
Ain't no way that I can picture my life
Everyday without you up in my life

How many times we said it's over
How many times we said there's no more us
Used to be a word that means so much
And it does to me

Can we make it all okay
Like we always did before
Baby tell me what to say
Baby I can't let you go
I just wanna work it out
Baby can we work it out
I don't wanna live without you
Baby can we work it out
Outt...

Now what the hell I look like
Letting you walk out of my life
Boy I've always been by your side
And everybody once in a while gon' fight

How many times we said it's over
How many times we said there's no more us
Boy I kno by now what no more means
It's temporary til we get over things

After all the times you messed up on me
I'd take you back, whenever you said please

And then we fighting over nothin and you wan' leave
I don't even think you know what you say to me

How many times we said it's over
How many times we said there's no more us
Used to be a word that means so much
And it does to me

Can we make it all okay
Like we always did before
Baby tell me what to say
Baby I can't let you go
I just wanna work it
Baby can we work it out
I don't wanna live without you
Baby can we work it out
Outt...

You don't wanna stay
You don't wanna go
You don't wanna play
You don't wanna throw
Everything away
Everything awayyy...

How many times we said it's over
How many times we said there's no more us
Used to be a word that means so much
And it does to me

Can we make it all okay
Like we always did before
Baby tell me what to say
Baby I can't let you go
I just wanna work it
Baby can we work it out
I don't wanna live without you
Baby can we work it out

Can we make it all okay
Like we always did before
Baby tell me what to say
Baby I can't let you go
I just wanna work it
Baby can we work it out
I don't wanna live without you
Baby can we work it out
