What could I even say to you Rene?  
If I could stop reacting then I'd be acting like your fool  
because  
What could I even say to you Rene?  
I could follow you but then you'd never see me right  
behind you

I went to a shrink and he found my brain  
And I have no ideas is what he found  
I went to a shrink and he found my brain  
And I have no ideas is what he found  
No ideas is what he found  
No ideas

What could I even say to you Rene?  
I could meditate and sleep all day but I'd never know  
what the first step to take was  
What could I even say to you Rene?  
Are we candles or are we wax,  
and with facts like that I'll never know how to relax

I went to a shrink and he found my brain  
And I have no ideas is what he found  
I went to a shrink and he found my brain  
And I have no ideas is what he found  
No ideas is what he found  
No ideas
