### "Love Child"

Visit "[Love Child](#)" on MotoLyrics.com

Daddy was young - gone before you ever were born  
Mama gave up - couldn't keep a baby alone  
And as hard as she tried  
She couldn't give you every need  
'cause the times they were bad  
With another mouth to feed

\*Love Child - no one ever loved you  
Love Child - nobody there to hold you  
Open your eyes and see that I love you  
I'll give you everything you need

Love Child - love is our protection  
Love Child - we'll find a new direction  
Safe in each other's arms - let's fly away

All your life - had to make it all on your own  
Pain and strife never seemed to leave you alone  
There was so little joy - never had a helping hand  
So a poor little boy had to learn to be a man

\*Repeat

I know that it's so very hard  
You have so many bad memories  
Take my heart and the love I give you  
Love child - won't you listen to me

\*Repeat
