Well my friend what you doing with your life
Couldn't do more damage if you used a knife
See you age s fast and i complain
So infatuated with a needle in your vein
Just a few kicks to get you off
So blind to the real cost
Your skin turns yellow you look so thin
Deep dark circles, we know where you've been
Just wishing you can hold your luck
It seems you don't give a royal fuck
Cause you sliding and then it's the end
Got to tell you cause your my friend
You gotta quit that shit
Get off your crash and die trip
So sad to see your life go so quick
Say it again your death wish is sick
Let's have a beer and try to make it last
Don't wanna see it all go so fast
You've gotta listen and get out of your haze
Hate to think you've got numbered days
That H is just a lot of junk

That speed you really don't need
Cocaine will make you crazy
It all makes you bleed
You got no answers, is it that much fun?
It'd only be quicker if you used a gun
Cause first you're sliding and then it's the end
Got to tell you cause you're my friend
You gotta quit that shit
Get off your crash and die trip
So sad to see your life go so quick
Say it again your death wish is sick
