You came into my life
thinking you were mister right
what made you think you were the one
I wanted to have for the rest of my life
you won't get what you want from me
I don't see the necessity you better get off
don't fuck with me I'm outta here, I'm history

You can get it anywhere but here
You can get it anywhere, anywhere,
anywhere but here
It is not necessary to get soft about it,
it's sad enough crying won't make it
easier for you to handle it
you won't get what you want from me
I don't see the necessity you better get off
don't fuck with me I'm outta here, I'm history
Try to feel what you want to feel,
what you need to feel, what you try
