You know it's not the best thing to do,
but I don't see another way
cos you just make me blue,
you know it's not the best thing to say,
but I can't help it
cos I feel that way

It's impossible, I gotta leave today
It's biological "no" no I can't stay
I gotta move along, no matter what you say
It's impossible to stay

It has to end even if I have to push with force,
you know I would've given,
would've given my life for yours,
but-----it don't even feel right,
the only thing that seems to work for us is fight

It's impossible, I gotta leave today
It's biological "no" no I can't stay
I gotta move along, no matter what you say
It's impossible to stay
