I like to close out the set usually with this song
Because it's the song that I feel means the most for me
There's so many things that we can chase after
For me being a musician it might be like a grammy or a
gold record or something
But ultimately the only thing that really satisfies us as
human beings is relationship
And relationship with one another, with your loved ones
with your family
And relationship with God
I think these are the only things that are eternal, and
the rest just fly away

So I'm about wanting to remember
My music is more than just me getting up here playing
and singing songs
I just want to encourage people to remember what
really is important
Because there's so much in this world that we can
chase after that's totally unimportant

And so I just thank you guys for being here
This is going to be my last song
And if I can encourage you in any way, it's to remember
what really is important
And to love one another and God, thank you
