Every day I dream of a vision
Where all the desires and fears
Run 'til the end

I believe there is a spot for us
A great perfect place for us
Inside our heads

And we believe that we are connected
To get a hug we are isolated

This is not what we are
It's not what we're made for
If the sky and the sea will no longer be fine
What'd be left in our hearts?

This is not what we want
Not what we have dreamed of
If we can't stand together and we fight for a cent
We will never evolve

They keep telling us what we need to live
Convincing us how to feel
Gotta find your way

Like a flash, luck just can change your hand
Keep looking, do not settle
Never run away

And we believe that we are so perfect
We are beyond, so far, affected

This is not what we are
It's not what we're made for
If the sky and the sea will no longer be fine
What'd be left in our hearts?

This is not what we want
Not what we have dreamed of
If we can't stand together and we fight for a cent
We will never evolve

Unify to attract all your wishes
Can't give up, your white dog is singing

This is not what we are
It's not what we're made for
If just what really matters will be more than extinct
What'd be left in our hearts?

This is not what we want
Not what we have dreamed of
If we can't stand together and we fight for a cent
We will never evolve

Take a look, your life
Make a better change
Be helpful for the world
