I don't think it's ever felt so good, felt so right
You here with me tonight
Kicking it on top of the world
And I think that we should stay here
I could pretend that I
Don't care if you say goodbye
We both know that would be a lie
I think that we should stay here.

Up on the clouds that we created don't have to be so complicated
Cause when you're looking down all your problems seem so small
When what you need is right beside you
When you're not looking but it finds you
You realize, you're living the good life, You already have it all

Nothing's gonna bring us down oh no
No one's gonna stop us here we go
Oh it feels so natural, just you and me on top of the world

Doesn't even matter what we do
I could spend forever here with you
'Cause you will always be my girl
just you and me on top of the world

I could see for miles and miles, from shore to shore
All the way up to your front door
I've never wanted anyone more
Girl I need you with me
Every day everywhere I go
Sunshine, rain, sleet or snow
Any which way the wind will blow
Girl I need you with me

Up on the clouds that we created don't have to be so complicated
Cause when you're looking down all your problems seem so small
When what you need is right beside you

When you're not looking but it finds you
You realize, you're living the good life, You already have it all

Nothing's gonna bring us down oh no
No one's gonna stop us here we go
Oh it feels so natural, just you and me on top of the world

Doesn't even matter what we do
I could spend forever here with you
'Cause you will always be my girl
just you and me on top of the world

So when troubles come just hold my hand
I'll be your king of the hill
I will fight for you, you I know I will.

Nothing's gonna bring us down oh no
No one's gonna stop us here we go
Oh it feels so natural, just you and me on top of the world

Doesn't even matter what we do
I could spend forever here with you
'Cause you will always be my girl
just you and me on top of the world
