Mother nature comforts us
Embraces to her breast
Fields of gold and icy plains
We feel her great caress

Cocooned by earthly majesty
A cosmic jewel in time
Surrounded by a giving sun
It's good to be alive

Pasture lands and silver streams
Finger through the land
Magnify the hopes and dreams
Moving, living sand

Canyons wind and trembled winds
Mountains touch the sky
It's nature's breath we all depend
It's good to be alive

OHHHHHH
