"First Kiss"

Friday night, football lights
Backseat, so polite.
Blue eyes, butterflies, heartbeats
I should say goodnight.

I don't wanna blow it
This could be the moment.

We let it fly, we let it go
All the stars align and the moon is shinin'
So much I wanna know.
This is the time
Too good to miss
Not on the cheek but on the lips
The first kiss!

I should call, want to stall
I know they'll worry about me.
Deep breath confess
There's no place
That I'd rather be.

And I'll remember always
The innocently sweet way.

We let it fly, we let it go
All the stars align and the moon is shinin'
So much I wanna know.
This is the time
Too good to miss
Not on the cheek but on the lips

The first kiss is what I want
Kiss that I adore
You're a little shy
Only makes me want you more.
Don't want this to end
Want your kiss again.

We let it fly
We let it fly.

I don't wanna blow it.
This could be the moment.

We let it fly, we let it go
All the stars align and the moon is shinin'
So much I wanna know.
This is the time
Too good to miss
Not on the cheek but on the lips
The first kiss!
The first kiss!

We let it fly
Friday night, football lights
Backseat
The first kiss!
