

Ultimate Fakebook "Far, Far Away"

Visit "[Far, Far Away](#)" on MotoLyrics.com

Isn't it funny to live for someone else's script
You spend a lot of money to catch that lift
And isn't it good to, to not always get all that you want
We'll be singin' 'Boo hoo hoo' if great it's not

'Cause everybody wants it so much better
Than anyone could ever let it be
I guess I should get off it or whatever
But please comfort me

George Lucas is the force with us
Will it save us from heartbreak in 1998?

Demons with the cat claws threaten us with their fake
grace
But angels without wings can't take their place
And if it's just a smart bomb in a theater far, far away
We'll be singin' 'Woo hoo hoo', oh man, that's great

'Cause I never thought that this could happen
That I could ever feel this way again
I know it's kinda dumb but it doesn't matter
I can't hold it in

George Lucas is the force with us
Will it save us from heartbreak in 1998?
George Lucas, don't lose your focus
'Cause the theaters will be full, come what may

Come what may
Come what may
Come what may

George Lucas is the force with us
Will it save us from heartbreak in 1998?

Save us from heartbreak
Save us from heartbreak
Save us from heartbreak
Save us from heartbreak
