Baby I know that you've been missing me
And he knows you've been playing around
We make a special kinda chemistry
Everytime you've been coming down
Oh if it's wrong to be loving you
Why does it feel so good to me
Baby tell me what I gotta do
To lay it down and to make you believe
We rocked the cradle
Let it fall
Leave him now or lose it all
We got something special that we won't find again
'Cause everytime I lie with you
Babe he knows you're lying too
Tell me who's loving you
Oh tell me
CHORUS:
Does he whisper your name
Can he love you like this
Does he love you the way that I love you baby
Does he ever whisper your name

Can he love you like this

Does he love you the way that I love you baby

Oh-oh way that I love

I never thought I'd be doing you

But I heard you were diggin' on me

Can't you see what we've got into

It's not a thing you can get up and leave

You had the time baby I had the place

So we could get it on

Baby turn around and show your face

'Cause it's time you let him see

We rocked the cradle

Let it fall

Playing me you risked it all

Baby we made loving like we won't find again

'Cause everytime I lie with you

Babe he knows you're lying too

Tell me who's loving you

Oh tell me

Does he whisper your name

Can he love you like this

Does he love you the way that I love you baby

Does he ever whisper your name

Can he love you like this (like this, like that)

Does he love you the way that I love you baby

Look at me now

I swear that I'm for real

Gotta believe I'll love you like no other baby

Now is the time

Time to tell him goodbye

No one else can love like I do

Does he whisper your name

Can he love you like this

Does he love you the way that I love you baby

Does he ever whisper your name

Can he love you like this

Does he love you the way that I love you baby

Does he whisper your name

Can he love you like this

Does he love you the way that I love you baby

Does he ever whisper your name

Can he love you like this

Does he love you the way that I love you baby
