Visit "[Perfect Progeny](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Create my clone from cell to bone  
Improve my feeble brain  
Superhumanize my thoughts  
Exclude my skin from pain  
We're making progress on the quest  
Hereditary codes are made  
We link in ways we think are best  
Notice the shade

Make your wish  
We serve your dish  
The common human being's  
To become a revelation  
Let our descendants  
Be reflections of our own  
With perfect senses of accommodation  
But have we considered  
Our creations new relations  
Watch out, beware  
Let us think about  
Environmental situations  
Look out, take care

Change my deoxyribonucleic acid  
Manipulate 'till perfect progeny

We can't make a better future  
Perfection's not what we will face  
We might create deterrent killers  
We threaten our own race

Change my deoxyribonucleic acid  
Manipulate 'till perfect progeny
