You give me exaltation  
Like a rush from the morning air  
All the endless roads we've taken  
Don't mean a thing I swear  
Destiny brought us together

Chorus:

We've all that we need  
As long as we're side by side  
We are sanctified  
I'll be the air that you breath  
And you'll bring me life  
Tonight we are unified

You're stronger than emotion  
Surrounding me inside  
This is the perfect time  
I feed on your devotion  
The eternal flame of life  
This is the reason I  
Feel destiny brought us together

(Chorus)

(Chorus)
