The wind is beating at the rooftops
It knows of the history here
The windows are rattling, they are cracking
The air, it just wants in
I want thunder and I want lightning
I want to be taken away
But only with my girl at my side, as we softly float away

I've found a place where I can go
Where I fit in and I forget I'm living in this town
I could drive us all around
'Cause I've found this place where we can go

So I'm just an unconscious vessel that you steer
through the storm
I'm tired of being invisible, I'm tired of being forgotten
So I'm twisting things around so we'll fall through the
cracks
The page is full, so don't panic

I've found a place where I can go
Where I fit in and I forget I'm living in this town
I could drive us all around
'Cause I've found this place where we can go
