Originally performed by Venom  
I'm alive but dead, awake but asleep  
As friend gather round and mourners they weep  
My mind thinks of all the things I have done  
My body is cold but my heart beat goes on  
And on... and on  
As they lower me down into that hole in the ground  
I scream out for help but they hear not a sound  
I fear at the lid, my fingers they bleed  
Is this happening to me or is it just a dream  
Summon the dead...  
Baphomets call...  
Blood on my hands...
