[Himself] See, staying on top of it all ain't no easy shit
Please believe me when I say these fools will turn on
you quick I've learned to say okay and argue with a
motherfucker for shit I don't have time for yellin' and
carrying on I just sit back and be quiet With the
satisfaction of knowing you were wrong You see I've
grown a whole lot and you have to learn fast There's a
place where a person will stab you in the back And take
everything that you have [Anacron] I only spent eleven
days at school in the eleventh grade I never stayed I
was over the fence, learning in several ways
Experiencing experience I hold no regrets Because I
roll with the best scores on life's little test While
building bad progress reports in a shade by the tree
You got A's constantly? Well that ain't bomb to me
Cause there are valedictorians who can't function in
society Or coherently tell me the price of deez
(motherfucker deez) [MURS] I obtain life lessons, mix
messages daily When I think I understand, the
contradictions drive me crazy I see my mother suffer
abuse from multiple men I seen the same woman get
right back up With the courage to love a man again
From my observations, I can see I know nothing Except
that I'm gonna die and before that comes some
sufferin' But once you except death it helps to ease the
sufferin' [Himself] I've learned to love and I've learned
to hate I've learned when to be in a rush and when to
wait I've learned when to disassociated and when to
relate I've learned a whole lot in my life along the way
I've learned when to frown up and when to smile I've
learned when to be humble and when to be wild I've
learned when to be quiet and when to be loud These
are hard life lessons learned since I was a child
[Anacron] I've learned that learning pays I've learned
in many ways I've learned that the mind is a terrible
thing to waste I've learned to say what I want to say I've
learned the instruments I play I've learned to love and
not lay I've learned the error of my ways And I've
learned my lesson I've learned to become wise I've
learned that gals love to get fucked as much as guys
I've learned that if you play with fire you gonna get

burned I've learned and lived I've learned and learned
[MURS] I need some help dude A phrase we hate sayin'
But it helps you lighten your load and make it through
the days And I know you got your pride But look Put it to
the side Let your homies play they part It never is a
burden when they give it from the heart And when you
on your feet you give it back in return And that's the
only way the title +Pal+ can get earned A lesson that I
learned that I'd like to pass on Cause we all need
assistance Ain't nobody that strong [Himself] In life I've
realized that people like to lie a lot To people gettin'
upset I drink and smoke private stock People playin'
both ends against the middle Tryin' to tie a knot
Jealously and envy are both reasons people die a lot
Stressin' over shit that ain't even worth worrying about
Can't even have a good time when you go out Life is
fucked up, but hell what are you gonna do? I got to
many fuckin' problems to be worrying about 'em too
I've learned to love and I've learned to hate I've
learned when to be in a rush and when to wait I've
learned when to disassociated and when to relate I've
learned a whole lot in my life along the way I've learned
when to frown up and when to smile I've learned when
to be humble and when to be wild I've learned when to
be quiet and when to be loud These are hard life
lessons I learned since I was a child
