You come around and make the seasons change
You come around and leave the way you came
You come around and wipe the tears away
You make me want to give my heart away

The way you speak and ease me without words
And when you're gone it makes me toss and turn
You come around and make sure that it hurts
Make sure that it hurts
When you're away

Here among the clouds
We are safe and sound
You lift me up
You lift me up

You come around and light up everything
You stun me with your smile and all you bring
You come around and make me wanna sing
And make me wanna sing
my fears away

Here among the clouds
We are safe and sound
You lift me up
You lift me up

Lift me up
Lift me up
Lift me up
