You, you look like an angel  
You look like an angel, tonight

You, you look like an angel  
You look like an angel, tonight

But I know, I know that they lie  
Saying the world spins on its side  
Cause I'm only aligned with your eyes.

You, you speak like an angel  
And you sound like an angel,  
When you sing.

You, you talk like an angel  
And you sound like an angel  
When you sing.

But I know, I know that they lie  
Saying the moon is pulling the tide.  
Cause I am only aligned with your eyes.

Thank, thank God for gravity,  
For pulling you back to me.  
So I'll write it all down  
And I'll sing it all out  
For the world to see

But you, you are an angel  
To me.
