Oh how I'm falling faster, into this state of mind  
I look at this barren page, with nothing left to write  
How I'm falling faster!

You've raised suspicion  
Based on what you've seen  
Things keep coming up  
I'm coming...

Coming clean  
Coming clean  
(Oh God redeem me) [x2]

Oh how I'm falling faster, into this state of mind  
I look at this barren page, with nothing left to write

You broke down the arms that kept me safe inside

There has never been a love so strong  
Keeping me in line

Oh how I'm falling faster, into this state of mind  
I look at this barren page, with nothing left to write

Oh God! Rid me from myself! [x6]

Turn me against the burdens inside me  
Open my eyes so I can clearly see  
How I've broken against my own oppressive behavior

Normal isn't so normal anymore...
