(unintelligible)  
...under the bass...  
...there are no...

your rails your thin your thin paper wings  
your thin paper wings  
in the wind dangling  
your sun fly right your window shattering  
the wind your coca-cola sign rattling rattling  
sugarbox sugarboy handheld candle sugarboy  
sugarbox sugarboy handheld candle sugarboy  
your rails your thin your thin paper wings  
your thin paper wings in the wind dangling  
your sun fly right your window shattering  
the wind your coca-cola sign rattling rattling

resonator resonator resonator resonator  
resonator resonator resonator resonator  
homeless strays gathering outside your window  
bootleg babies call to you  
lying amongst the mosquitoes  
this summer fever's coming  
cats are gathering outside your window  
bootleg babies call to you  
lying amongst the mosquitoes

your rails your thin your thin paper wings  
in the wind your sun fly right rattling rattling  
your window shattering the wind  
shining on your coca-cola sign  
your rails your thin your thin paper wings

there is a sound on the other side of this wall  
a burning singing on the other side of this glass  
footsteps concealed  
silence is returning a voice

walking in the wind at the water's edge  
comes closer covering my rubber feet  
listening to the barbed wire, hanging

walking in the wind at the water's edge  
come closer covering my rubber feet  
listening to the barbed wire, hanging

there is a sound on the other side of this glass!  
a burning singing on the other side of this glass!  
footsteps! concealed! silence is returning a voice!

you should not walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should walk away!  
when you walk away!  
you should remember!
