

# Unearth "Endless"

Visit "[Endless](#)" on MotoLyrics.com

Shadows of doubt consume you  
The light you barely see  
Growing wings of sorrow  
Have brought you to the winds of plague

Increscent boundaries fade the way  
A barren future all to real  
And still I try to seek up and find the flame  
And still I try, inside

It's endless  
A barren future all to real  
And still I try

Endless fight, fight, fight, fight  
Endless tragedy  
Endless lunacy

Chalk up the past as a memory  
This battering sickness has surely won  
Chalk up the past as a memory  
This battering sickness has surely

'Cause all I have wasted  
Will this erase me  
[Incomprehensible]  
[Incomprehensible]

All I have wasted  
Will this erase me  
All I have wasted  
Will this erase me

Time to clean my wounds  
[Incomprehensible], can I win this battle inside and out  
Can I win this battle inside, outside

Endless fight, fight, fight, fight  
Endless tragedy  
Endless lunacy, lunacy
