

Unearth "The March"

Visit "[The March](#)" on MotoLyrics.com

This moment - One moment
A time to face hate horror
A clash - Great clash
The two worlds collide
The power - Vast power
Each side drives its armies
The solace - No solace
This is what we've become

The past thou shalt never cross
Things here will never be the same
All bear witness to the gathering of the march

This is what we've become
No solace
This truth - One truth
The underlying reason
One hope - All hope
The strength of mankind risen
Our kind - Their kind
Once one - now shattered
Unite - Unite
We hold the key to tomorrow

The past thou shalt never cross
Things here will never be the same
All bear witness to the gathering of the march

Bring them down
Take it back
